QUESTION

The notion that differences in sexual behaviour are enough to explain Africa’s hyper-epidemics of HIV does not have strong evidence.

Critique this statement clearly indicating whether you agree or disagree with Sawes, Isaac & Stillwaggon (2011). Your discussion must focus on all below topics:

- MARPs (Most at risk populations);
- Male circumcision;
- Polygamous relationships;
- Multiple concurrent sexual partners and coital dilution;
- Prevention strategies.

(Max 6 pages, 50 marks)

PLEASE NOTE THE FOLLOWING WITH REGARD TO THE ASSIGNMENT

- You are requested to hand in a typed assignment in the following format:
  - Arial font, font size 12
  - 1.5 line spacing
  - Margins 2 cm
- **PLAGARISM** is considered a serious offence, please indicate all references used throughout the text and include a reference list at the end of your assignment. Also, ensure that all assignments submitted is your own original work. Please note that assignments will be uploaded onto Turnitin.com to determine plagiarism and actions will be taken accordingly.
- Assignments must be submitted **BEFORE THE DUE DATE**! Please note that no submissions will be accepted after the indicated due dates!

!Enjoy the assignment!
